

## NEWS RELEASE

For Release: Tuesday, May 20, 2014

14-594-ATL

SOUTHEAST INFORMATION OFFICE: Atlanta, Ga.

Technical information: (404) 893-4222 • [BLSInfoAtlanta@bls.gov](mailto:BLSInfoAtlanta@bls.gov) • [www.bls.gov/regions/southeast](http://www.bls.gov/regions/southeast)

Media contact: (404) 893-4220

### Occupational Employment and Wages in Gulfport-Biloxi, May 2013

Workers in the Gulfport-Biloxi Metropolitan Statistical Area had an average (mean) hourly wage of \$17.79 in May 2013, over 20 percent below the nationwide average of \$22.33, according to the U.S. Bureau of Labor Statistics. Regional Commissioner Janet S. Rankin noted that, after testing for statistical significance, wages in the local area were significantly lower than their respective national averages in 17 of the 22 major occupational groups, including management, sales and related, and office and administrative.

When compared to the nationwide distribution, local employment was more highly concentrated in 7 of the 22 occupational groups, including food preparation and serving related, personal care and service, and construction and extraction. Conversely, 11 groups had employment shares significantly below their national representation, including production, business and financial operations, and office and administrative support. (See [table A](#) and box note at end of release.)

One occupational group—food preparation and serving related—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Gulfport-Biloxi had 13,280 jobs in food preparation and serving related, accounting for 13.2 percent of local area employment, significantly higher than the 9.0-percent share nationally. The average hourly wage for this occupational group locally was \$9.65, measurably below the national wage of \$10.38.

With employment of 2,660, waiters and waitresses was the largest occupation within the food preparation and serving related group, followed by food preparation workers (1,650). Among the higher paying jobs were first-line supervisors of food preparation and serving workers, and institution and cafeteria cooks with mean hourly wages of \$14.64 and \$10.77, respectively. At the lower end of the wage scale were fast food cooks (\$8.21) and dining room and cafeteria attendants and bartender helpers (\$8.63). (Detailed occupational data for food preparation and serving related are presented in table 1; for a complete listing of detailed occupations available go to [www.bls.gov/oes/current/oes\\_25060.htm](http://www.bls.gov/oes/current/oes_25060.htm).)

\* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

<sup>1</sup> A positive percent difference measures how much the mean wage in Gulfport is above the national mean wage, while a negative difference reflects a lower wage.

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Gulfport-Biloxi Metropolitan Statistical Area, above average concentrations of employment were found in many of the occupations within the food preparation and serving related group. For instance, food preparation workers were employed at 2.6 times the national rate in Gulfport, and institution and cafeteria cooks, at 1.9 times the U.S. average. On the other hand, restaurant cooks had a location quotient of 1.1 in Gulfport, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Mississippi Department of Employment Security.

OES wage and employment data for the 22 major occupational groups in the Gulfport Metropolitan Statistical Area were compared to their respective national averages based on statistical significance testing. Only those occupations with wages or employment shares above or below the national wage or share after testing for significance at the 90-percent confidence level meet the criteria.

NOTE: A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

### Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. Guam, Puerto Rico, and the Virgin Islands are also surveyed, but their data are not included in the national estimates. OES estimates are constructed from a sample of about 1.2 million establishments. Forms are mailed to approximately 200,000 sampled establishments in May and November each year for a 3-year period. May 2013 estimates are based on responses from six semiannual panels collected in May 2013, November 2012, May 2012, November 2011, May 2011, and November 2010. The overall national response rate for the six panels is 75.3 percent based on establishments and 71.6 percent based on employment. The sample in the Gulfport-Biloxi Metropolitan Statistical Area included 1,302 establishments with a response rate of 80 percent. For more information about OES concepts and methodology, go to [www.bls.gov/news.release/ocwage.tn.htm](http://www.bls.gov/news.release/ocwage.tn.htm).

The OES survey provides estimates of employment and hourly and annual wages for wage and salary workers in 22 major occupational groups and 821 detailed occupations for the nation, states, metropolitan statistical areas, metropolitan divisions, and nonmetropolitan areas. In addition, employment and wage estimates for 94 minor groups and 458 broad occupations are available in the national data. OES data by state and metropolitan/nonmetropolitan area are available from [www.bls.gov/oes/current/oessrcst.htm](http://www.bls.gov/oes/current/oessrcst.htm) and [www.bls.gov/oes/current/oessrcma.htm](http://www.bls.gov/oes/current/oessrcma.htm), respectively.

The May 2013 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at <http://www.bls.gov/soc> and information about the 2012 NAICS is available at [www.bls.gov/bls/naics.htm](http://www.bls.gov/bls/naics.htm).

### Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Gulfport-Biloxi, Miss. Metropolitan Statistical Area** includes Hancock, Harrison, and Stone Counties.

**Additional information**

OES data are available on our regional web page at [www.bls.gov/regions/southeast](http://www.bls.gov/regions/southeast). Answers to frequently asked questions about the OES data are available at [www.bls.gov/oes/oes\\_ques.htm](http://www.bls.gov/oes/oes_ques.htm). Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at [www.bls.gov/oes/2013/may/methods\\_statement.pdf](http://www.bls.gov/oes/2013/may/methods_statement.pdf). Information in this release will be made available to sensory impaired individuals upon request – Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.

**Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Gulfport-Biloxi Metropolitan Statistical Area, May 2013**

Occupation <sup>(1)</sup>	Employment		Mean wages	
	Level <sup>(2)</sup>	Location quotient <sup>(3)</sup>	Hourly	Annual <sup>(4)</sup>
Food Preparation and Serving Related Occupations .....	13,280	1.5	\$9.65	\$20,070

Hosts and Hostesses, Restaurant, Lounge, and Coffee Shop .....	380	1.4	8.29	17,240

<sup>(1)</sup> For a complete listing of all detailed occupations in Gulfport-Biloxi, MS, see [www.bls.gov/oes/current/oes\\_25060.htm](http://www.bls.gov/oes/current/oes_25060.htm).

<sup>(2)</sup> Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

<sup>(3)</sup> The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

<sup>(4)</sup> Annual wages have been calculated by multiplying the hourly mean wage by a 'year-round, full-time' hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.
